The Mercedes-AMG S 63 Coupé. The expression of intensity.

Mercedes-Benz

Pure power: sensational, amazing, thrilling.

It is the most exclusive of its kind. It combines technical prowess with the ultimate in driving pleasure, quenches a longing for luxury and freedom, delighting with unbridled power and unparalleled dynamism.

It has been developed to surpass even the highest expectations: the Mercedes-AMG S 63 Coupé.

Welcome to the world of AMG.

*Please read the disclaimer.

S 63 COUPÉ

High performance that gets under your skin.

Luxury and performance are no contradiction in terms. The Mercedes-AMG S 63 Coupé cannot hide its motorsport roots – they are in its genes. And they are directly tangible as soon as you touch the accelerator and bring the AMG 4.0-litre V8 biturbo engine to life. When 450 kW (612 hp) and 900 Nm of torque accelerate the Mercedes-AMG S 63 Coupé from 0 to 100 km/h in just 3.5 seconds. When pure force combines with pure emotion to produce perfect performance.

*Please read the disclaimer.

A sight to behold. From any angle.

It all begins with a design idiom that words can barely describe. Shaped by the typical proportions of a large luxury coupé. In the form of a long bonnet with emphatic powerdomes and an elegant roof line including frameless side windows. With a rear end signalling the imposing presence of the Mercedes-AMG S 63 Coupé.

*Please read the disclaimer.

A loving attention to the finer details.

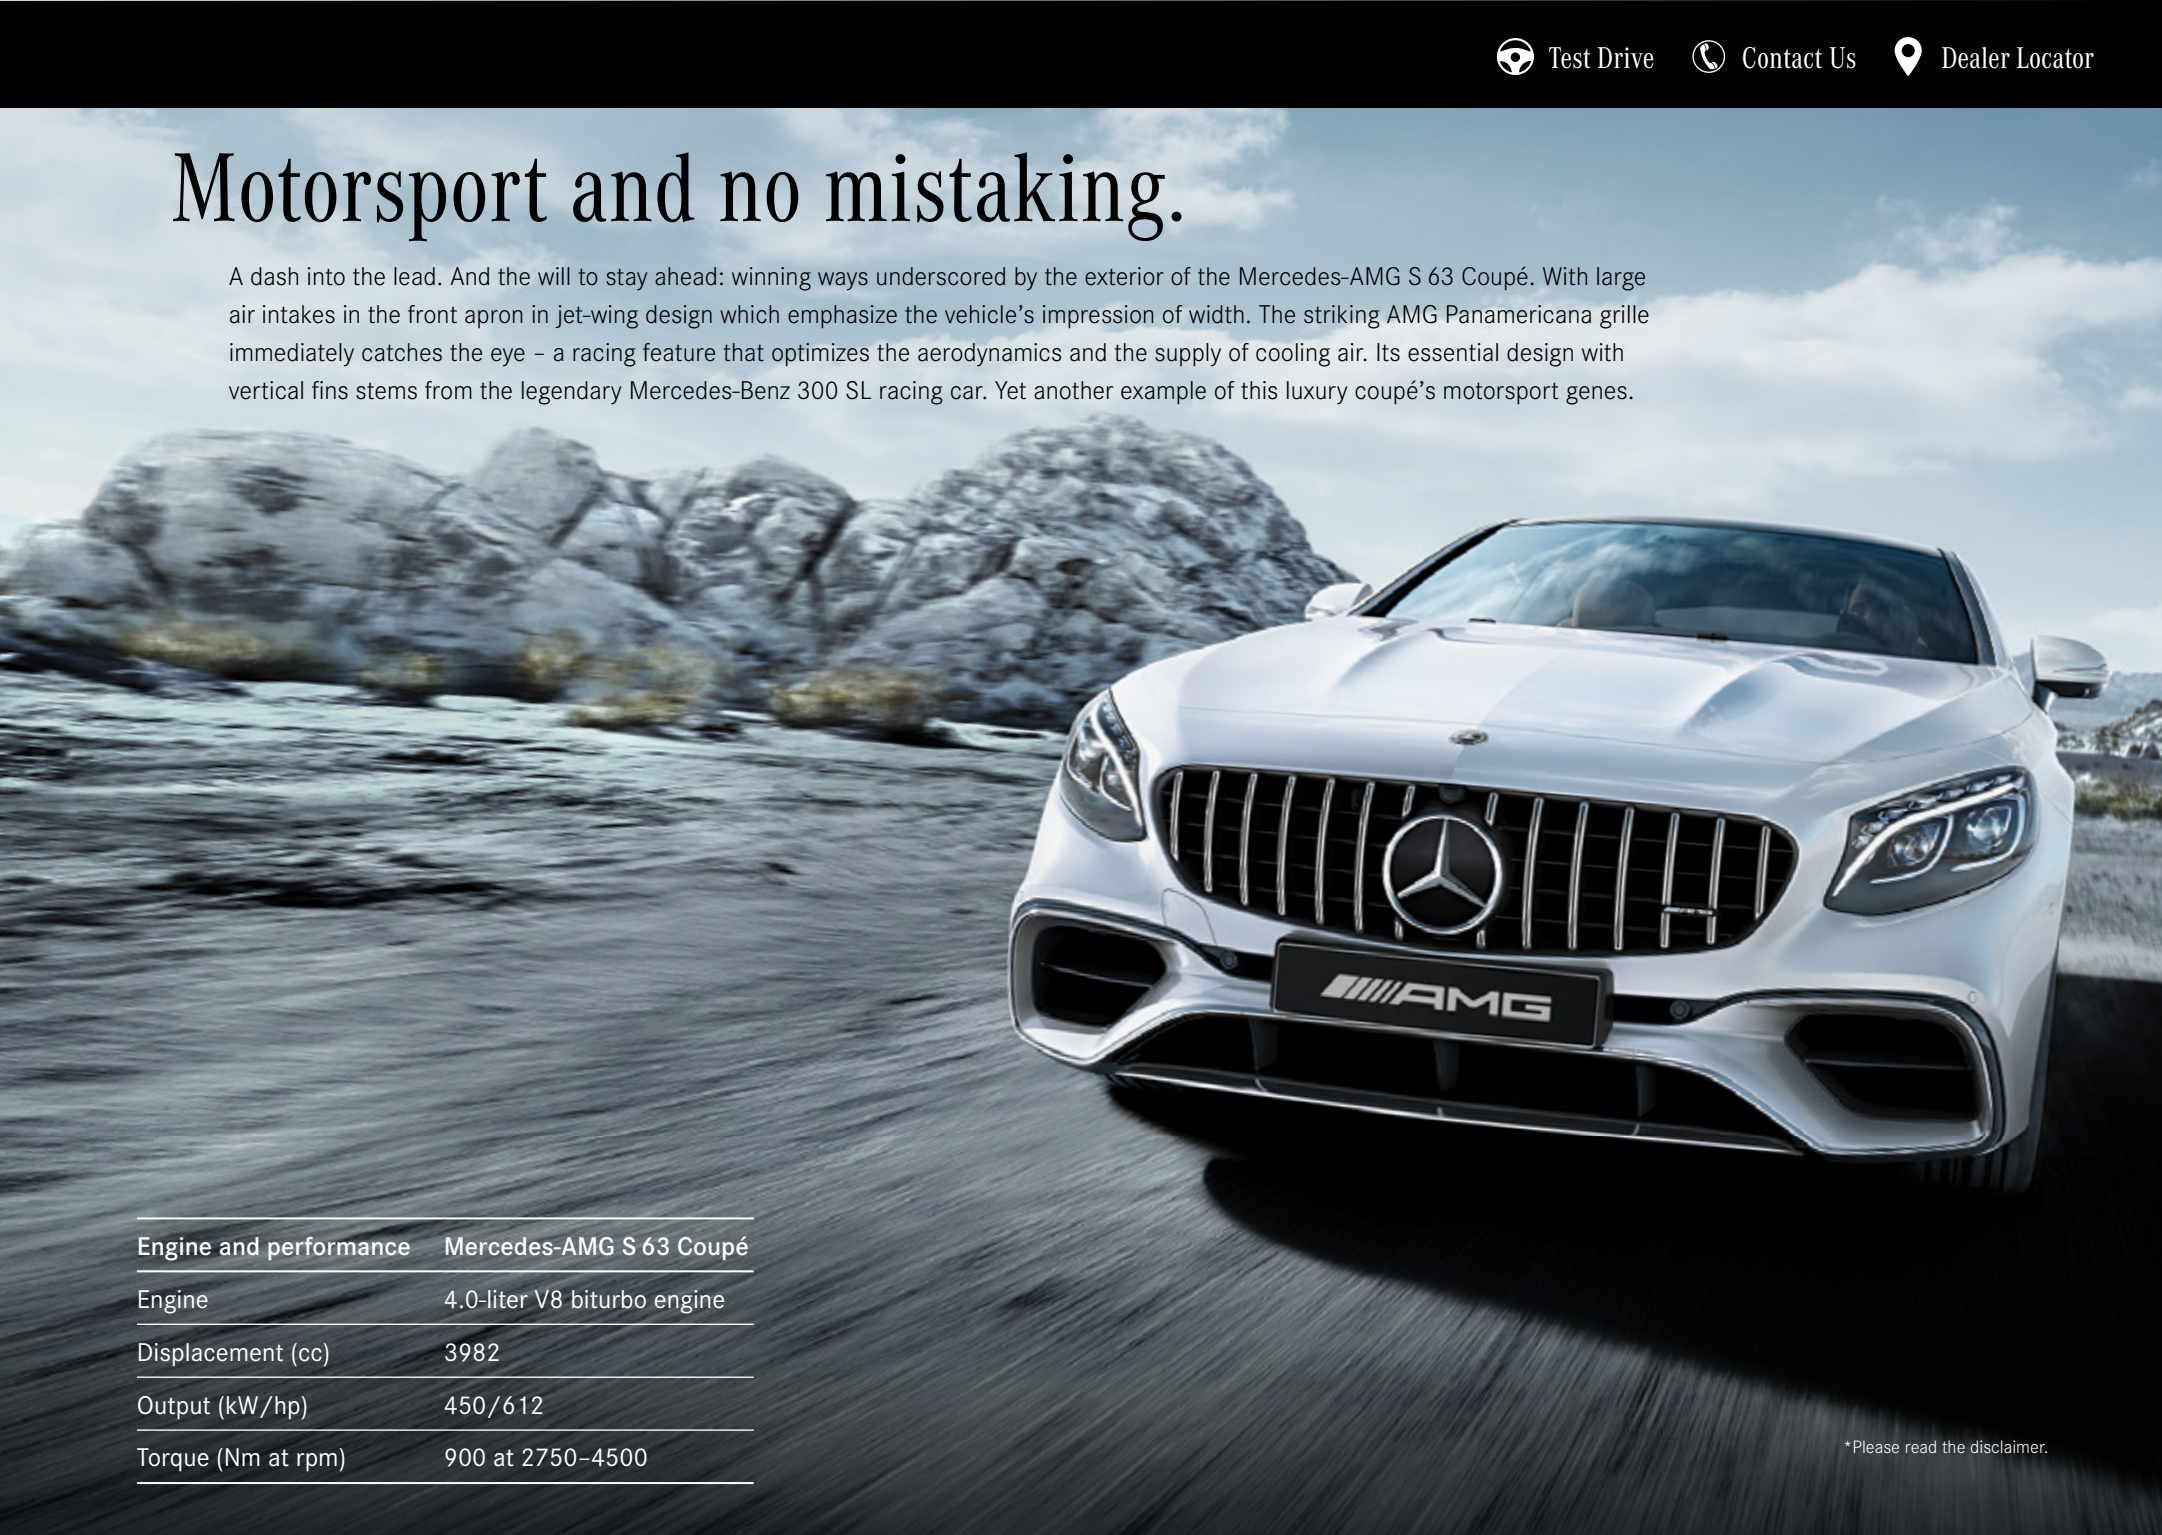

No one wants to forego luxury. Even at speeds of 300 kmph. Perfectly finished materials guarantee the most refined driving experience – the specially developed AMG sports seats in fine nappa leather with AMG specific upholstery layout, for example. These offer optimum lateral support and the ultimate in comfort – even on long journeys. Indulge in pure, unadulterated driving pleasure, optionally making your mark with 50.8 cm (20”) AMG cross-spoke forged wheels. Keeping everything under control with the AMG high-performance composite braking system, with red-painted brake callipers. The AMG high-performance ceramic composite braking system is additionally available as an option.

*Please read the disclaimer.

Motorsport and no mistaking.

A dash into the lead. And the will to stay ahead: winning ways underscored by the exterior of the Mercedes-AMG S 63 Coupé. With large air intakes in the front apron in jet-wing design which emphasize the vehicle's impression of width. The striking AMG Panamericana grille immediately catches the eye – a racing feature that optimizes the aerodynamics and the supply of cooling air. Its essential design with vertical fins stems from the legendary Mercedes-Benz 300 SL racing car. Yet another example of this luxury coupé's motorsport genes.

Engine and performance	Mercedes-AMG S 63 Coupé
Engine	4.0-liter V8 biturbo engine
Displacement (cc)	3982
Output (kW/hp)	450/612
Torque (Nm at rpm)	900 at 2750–4500

*Please read the disclaimer.

Supremacy needs technical genius. And a home.

With the conviction that they can win, Hans Werner Aufrecht and Erhard Melcher laid the foundation stone for AMG in 1967. Together, they optimized engine performance and participated in customer sport. They were soon competing against strong and established racing teams – winning their class at the legendary Spa 24 Hours in 1971 with the AMG 300 SEL 6.8.

Their courage and their determination to risk the impossible, and to work hard at it, define the spirit of our Affalterbach development facility to this day. This is where 1300 employees work together to develop fascinating performance vehicles and sports cars – built with high-tech and craftsmanship. 700 engineers in the development department make AMG a driver of innovation within the sector. Our development center is continually setting new benchmarks with state-of-the-art production management and pioneering sustainability concepts.

Staying at the top demands strength.

It's an all new engine for the Mercedes-AMG S 63 Coupé. Poised to deliver top performance: the AMG 4.0-liter V8 biturbo engine in the Mercedes-AMG S 63 is closely related to the engine of the Mercedes-AMG GT super sports car. With 450 kW (612 hp) and 900 Nm, it sets benchmarks in terms of both output and torque. The engine uses the tried and tested biturbo charging system in which the two chargers are not located on the outside of the cylinder banks but between them, in the V formed by the cylinders – the "hot inner V", as it's known to the experts. This fundamental principle allows both a compact engine design and a more spontaneous response from the turbochargers. In addition, its cylinder shutoff system is among the features that make this one of the most efficient series-produced V8 engines in the world.

*Please read the disclaimer.

AMG SPEEDSHIFT MCT 9-speed sports transmission – faster, smoother, more efficient.

For the first time the Mercedes-AMG S 63 Coupé has been fitted with the AMG SPEEDSHIFT MCT 9G transmission, which convinces with extremely short shift times, lightning reactions to shift paddle commands, a double-clutching function and fast multiple downshifts. A wet start-off clutch replaces the torque converter of the production model. This saves weight and improves the response to the driver's accelerator pedal input, particularly during acceleration and load changes.

Safety and Assistance.

Driving Assistance package

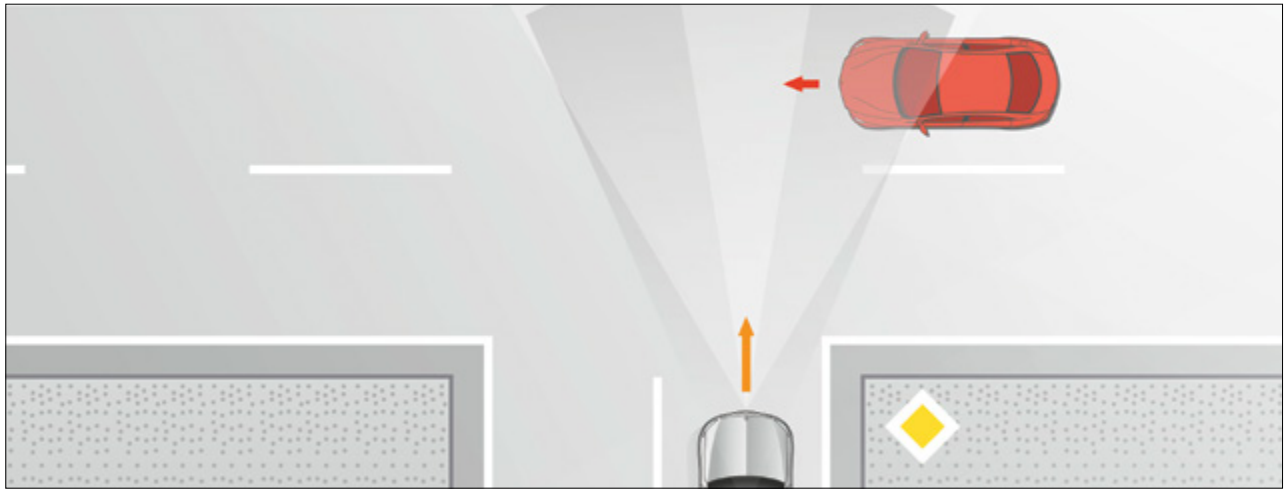

Assisted driving on motorways, country roads and even in town, assisted situation-dependent braking in critical situations when needed, and active assistance during evasive manoeuvres – these are just some of the functions of the Driving Assistance package. The aim: more comfort and less stress by relieving the driver‘s workload, thereby improving safety for all road users.

Active Distance Assist DISTRONIC and Active Steering Assist – providing support with driving, reducing stress.

With the combination of Active Distance Assist DISTRONIC and Active Steering Assist, Mercedes-Benz is taking the next step on the road to automated driving. The systems are automatically able to maintain the correct distance from vehicles ahead in city traffic, on country roads and motorways, and follow them at speeds up to 210 km/h. Within the operating range and system limits of the active assistance systems, as a rule the driver does not need to intervene by braking or accelerating and additionally receives considerable assistance with steering. The Active Distance Assist DISTRONIC with extended automatic moving off again in a tailback independently moves the vehicle off again on motorways when it has been stationary for less than 30 seconds.

AMG Driver’s package

AMG Driver‘s Package - by increasing the top speed to 300 km/h, the AMG Driver‘s package offers an even sportier driving experience.

Safety and Assistance.

Night View assist plus (available as a *designo* option)

Only 20% of road traffic is at night-time, but 40% of all fatal accidents occur during this period. Night View Assist Plus enables drivers to detect pedestrians or larger animals sooner in the dark. They are clearly highlighted in the cockpit display. To do this the system illuminates the road ahead with two anti-dazzle infrared lamps. With the help of an infrared camera located behind the windscreen, the entire area within high-beam headlamp range is shown as a crystal-clear greyscale image. A thermal imaging camera in the radiator grille is able to give a precise warning by distinguishing between irrelevant objects such as traffic sign combinations or bushes and relevant objects such as pedestrians or large animals. The latter are highlighted in colour by small „photo mounts“. The spotlight function enables endangered pedestrians to be flashed at several times, so that the driver registers them even more quickly and the former recognise the danger. As standard the night view image only appears automatically when a hazardous situation is recognised.

*Please read the disclaimer.

Safety and Assistance.

LED Light package

For the best possible visibility on country roads and motorways, when cornering and on bends, the low beam mode of the LED Intelligent Light System automatically adapts to the weather, lighting and driving conditions. In high-beam mode Adaptive Highbeam Assist Plus allows continuous long-range illumination of the road ahead without dazzle. It obscures part of the light beam for oncoming traffic or vehicles travelling ahead. The road verges continue to be illuminated by high-beam light. To prevent the driver from being dazzled by his own headlamps, Adaptive Highbeam Assist Plus dims the high beam when it strikes highly reflective road signs. The LED Intelligent Light System thus makes a key contribution to safe driving. LED technology impresses with its very low energy consumption, long operating life and pleasant white light that comes close to the spectrum of natural daylight.

Exteriors.

AMG Night package – expressive sportiness

Black design elements highlight the vehicle's expressiveness and sportiness – from the front splitter and trim strips on the jet wing of the AMG front apron, via the exterior mirror housings and the inserts in the AMG side sill panels, through to the diffuser board of the rear apron. Two black chrome-plated twin tailpipe trim elements add a thrilling final touch.

Red-painted brake callipers

Painting the brake callipers in red visually underscores the high performance of the brake system.

Interiors.

AMG Performance steering wheel in carbon fibre / DINAMICA microfibre

The combination of carbon fibre and DINAMICA microfibre makes the steering wheel a highlight in terms of its look and feel. Touch Control buttons allow intuitive control of most functions. Innovative: Integrated cruise control in the left-hand grip area.

Exclusive package – the pleasure of excellence

The stylishly coordinated combination of high-quality appointments meets the highest expectations with regard to comfort, quality and design. Generous use of exclusive nappa leather and large-area trim enhance the exclusivity of the interior. The effect is heightened by other fine details, such as the illuminated door sill panels with “Mercedes-Benz” lettering as well as the designo roof liner and sun visors, which are covered in elegant DINAMICA microfibre.

Interiors.

Active Multicontour Seat package

Thanks to inflatable air chambers, the active multicontour seats with ENERGIZING massage function and dynamic function ensure optimum seating comfort and outstanding lateral support. The driver and front passenger are able to adjust the air chambers in the lumbar and shoulder areas individually to suit their personal physique. A lumbar adjustment gives additional support to the spine. With the vehicle in motion, the side bolsters automatically and dynamically adapt to the vehicle movements to provide even better lateral support on winding roads and when a sporty driving style is adopted. The ENERGIZING massage function stimulates and relaxes the back muscles as required, with 14 air chambers, six programs and two intensities. This function therefore helps to maintain alertness even on long journeys. The combination of gentle pressure and pleasant warmth is particularly soothing.

Climatised front seats

The active ventilation function of the seat climate control rapidly cools the seat surfaces to a pleasant temperature. Upon activation, interior air is drawn in through the perforated leather upholstery for eight minutes. The fans then change their direction of rotation automatically, delivering cooler ambient air to the seat occupant from behind and beneath the seat. The airflow passes through the seat structure, is evenly distributed through the upper layer and finally penetrates though the whole area of the seat cover. In so doing it absorbs humidity and quickly creates a balanced seating climate – even if the vehicle has been heated up extremely by solar irradiation. On cold days, the on-demand seat heater provides cosy warmth as required. Seat ventilation and seat heater can be independently set in three stages at the touch of a button.

Interiors.

Burmester® surround sound system with 13 speakers

13 high-performance speakers as well as electronics and acoustic features tailored specifically to the vehicle make for the first-class Burmester® “feel-good sound”. The surround function and the sound optimisation for the front and rear seats provide an even more intensive listening experience.

ENERGIZING comfort control

The goal is an alert driver – for this purpose, tailored programmes combine a variety of comfort functions. ENERGIZING comfort control combines various in-vehicle comfort systems into precisely defined programmes for enhanced alertness and well-being during a journey. These support the driver in monotonous driving situations or produce a targeted sense of well-being. Included are climate control, fragrancing/ionisation, lighting mood, music/videos as well as massage function, heating and ventilation of the seats.

*Please read the disclaimer.

Interiors.

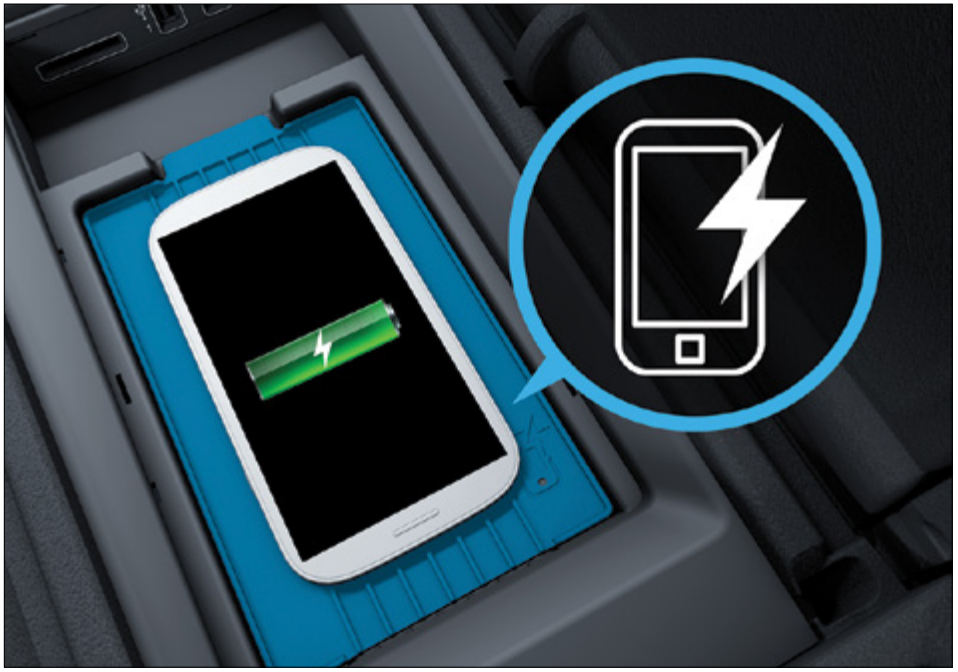

AIR-BALANCE package

The vehicle interior can be fragranced to suit personal preference with the AIR-BALANCE package. There is a choice of six high-quality interior fragrances to suit to personal preferences.The fragrance can be easily changed by exchanging the fragrance flasks used in the generator in the glove compartment. The intensity and duration of the fragrancing are adjustable. The fragrance is discreet, given off gently and rapidly dissipated after switching off. In addition, the air quality can be improved by ionisation and optimised filtering of the incoming and recirculating air.

Wireless charging system – power supply without cable or charger cradle

The wireless charging system functions with all mobile devices which support or can be upgraded to support the Qi standard. The charging surface is integrated into the quick stowage tray in the front on the centre console and accepts mobile phones with a screen diagonal of up to 15.2 cm (6 inches). A connection is quickly established between the multimedia system and mobile phones via Near Field Communication (NFC) by touching the “NFC” logo. Telephone calls are then conducted automatically via the Bluetooth® hands-free system.

*Please read the disclaimer.

Interiors.

Smartphone integration package

Smartphone Integration allows integrating iPhones® via Apple CarPlay™ as well as Android smartphones with Android Auto into the vehicle, and operating them by voice control – certain functions can also be used via the vehicle controls. This makes safe use possible while on the move. The connection to the smartphone provides access to the latest software and data such as, e.g. navigation and traffic information, media (streaming media and IP radio), as well contact information, telephony/FaceTime and messaging. To prevent driver distraction while at the wheel, not all smartphone content is duplicated.

designo customizations.

AMG Exterior Carbon package

High-quality applications in genuine carbon fibre create striking, sporty highlights when viewed from any angle – from the front splitter to the exterior mirror housings, and from the inserts in the side sill panels to the rear apron insert.

AMG carbon-fibre engine cover

High-quality genuine carbon fibre underscores the engine‘s power in an imposing manner. The cover emphasizes both the vehicle‘s sportiness and the structured arrangement of the engine components.

designo customizations.

Burmester® high-end 3D surround sound system

25 specially designed speakers, 27 amplifier channels with a total system output of 1560 watts, as well as technologies developed exclusively for the vehicle, ensure an extraordinarily expressive and intriguing 3D sound – the Burmester® "feel-good sound". With the 3D surround sound system, passengers are able to experience and enjoy a 3D reproduction of mono, stereo and multi-channel audio signals in the vehicle.

Panoramic roof with MAGIC SKY CONTROL

MAGIC SKY CONTROL creates an open-air feeling at the push of a button. The large panoramic roof changes from dark to transparent or vice versa within a few seconds. In its tinted state, it substantially reduces heating-up of the vehicle interior. MAGIC SKY CONTROL is activated via a switch in the overhead control panel. When electrical voltage is applied, particles in the glass structure align themselves so that light can pass through the glass. The passengers enjoy a clear view of the sky and a particularly light and friendly atmosphere in the interior. The glass darkens when the voltage is switched off.
The particles are distributed randomly and stop most of the light from passing through. This type of screening is far more effective than a roof with conventional tinted glass. This way, it is possible to reduce the interior temperature by up to 10°C. As the roof is de-energised when the vehicle key is removed, the glass darkens automatically when the vehicle is parked, thus preventing the interior from heating up and making it difficult for prying eyes to see inside the vehicle.

designo customizations.

Head-up Display

Key driver information at a glance, without the driver having to take their eyes off the road – this is a feature made possible by the head-up display. It projects a virtual image measuring approximately 21 x 7 cm into the driver's field of vision, which appears to float around 2 metres in front of him/her, above the engine bonnet. The information is displayed in high-resolution and in colour. Depending on equipment, the information displayed may include navigation tips, speed, speed limits or settings for cruise control or Active Distance Assist DISTRONIC, for example. A special light sensor adjusts the brightness of the display to suit the ambient light conditions. Good visibility of the display is therefore guaranteed even on sunny days or at night. The height of the display can be adjusted, making it easy to read for drivers of all sizes. The height setting for the display can also be stored in combination with the memory function for the seats. The content that is displayed and the brightness can also be individually selected.

AMG ceramic high-performance compound brake system

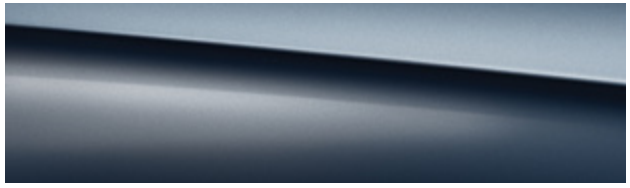

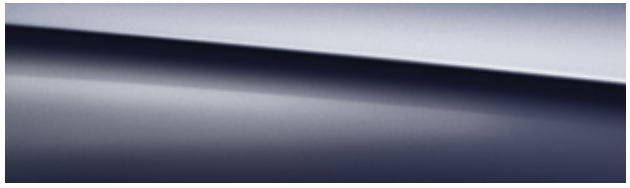

Extremely short braking distances, precise pressure point and very high fade resistance even in extreme operating conditions - the AMG ceramic high-performance compound brake system offers race track braking performance. It is immediately recognisable by the specially painted brake callipers in bronze colour with "AMG Carbon Ceramic" lettering. The discs in a carbon-fibre reinforced ceramic material are produced under vacuum conditions at 1700 degrees Celsius. This special material and the applied production process give the brake discs a particularly high degree of hardness. The resultant resistance to extreme loads and heat gives rise to a service life many times longer than that of a grey cast-iron brake disc. The ceramic brake discs are around 40% lighter than conventional compound brake discs. The reduction in unsprung masses enhances driving dynamics and agility. The steering response and the sensitivity of the suspension are also improved.

My Mercedes. My Service.

You enjoy life. We'll take care of your Mercedes.

The best or nothing! This statement conveys how Mercedes-Benz aspires to develop and build highly desirable, top-class vehicles. The same passion, pledge and commitment apply to the Mercedes-Benz Service too. The bouquet of world-class After-Sales products will not only attend to every need of your Star but will also redefine the concept of ownership experience with a focus on providing end-to-end customer delight. After all, you Star deserves nothing less than the best.

STAR EASE

Delivering the best-in-class value

Servicing your Star does not get any better than this. With the STAR Ease Maintenance Packages, pay a defined cost of maintenance based on the model, contract period and mileage and say goodbye to spending on service every time. Plus, enjoy exclusive features like priority handling, shorter waiting time and quicker processes.

Advance Assurance Program

Extending your warranty coverage

With Advance Assurance Program, experience complete peace of mind. While this Extended Warranty Program kicks in the moment your standard 3 years warranty comes to an end, it can be extended further up to 6 years at a nominal price. Also, it comes with a bouquet of privileges for a worry-free time with your Star.

MOBILO

Providing you 24x7 mobility support

Your vehicle comes with Mobilo which provides round-the-clock on-road assistance service. Mobilo comes as a standard for 3 years and can be extended further up to 8 years at a nominal cost. This service offers privileges like vehicle towing facility, replacement vehicle, hotel accommodation, just to name a few.

Mercedes-Benz Genuine Parts

Now with 2 years* of warranty

Mercedes-Benz GenuineParts are crafted to the state-of-the-art standards of Mercedes-Benz, protecting your vehicle's performance while maintaining the style, comfort and safety, for the years to come. Also, they come with a warranty of up to 2 years, ensuring you a peaceful ownership experience with your Star.

* Terms & Conditions Apply

*Please read the disclaimer.

Mercedes-Benz Approved Tyres and Rims

Ensuring every ride is a safe and joyful one

Maximise the safety and comfort of your Star with Mercedes-Benz approved tyres and rims. While the Mercedes-Benz approved tyres are designed to optimally match your car's performance, the Mercedes-Benz approved rims are designed to lend an exceptional style to the exterior of your Star and are also engineered for optimal performance.

Mercedes-Benz Genuine Chemical Products

Because your Star deserves nothing but the original

Mercedes-Benz Genuine Chemical Products are specially tested for compatibility with the materials in our cars and meet the high quality standards. Also, our products have been approved under Daimler AG's strict, self-imposed environmental norms. Now with Mercedes-Benz Genuine Chemical Products, experience a whole new world of superior products that support throughout the car's life cycle.
